

# Countach Ignition/Timing/Smog Diagram w/(MSD) - GLA12025

Jason Jones - Lambostuff.com /Bullstuff.com - 6-2-2013

Freely Distributable Rev 1.2

Special thanks and help from:  
Michael Wilson "Japla Mike"  
John Kar  
Chad Bolles

Green line = TACH  
Blue line = +12 IGN  
Black line = GROUND  
Blue line = +12 Relayed IGN

This information is being provided free of charge and with no warranties. I simply got very frustrated with the lack of information, proper documentation and general mystery of the Countach's Wiring and EFI system. This is my personal documentation, use at your own risk as there are variances between VIN's, Markets and what color spool of wire they had that week. If you found value from it, I simply ask for the opportunity to earn your business.
