Wiring Diagram

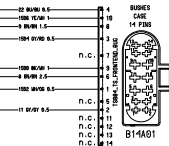

The wiring diagram consists of individual wiring diagrams and overview Sheets for ground points, components, plugs, connector points, relay holders and fuses. The individual wiring diagrams are divided up into coordinate fields.

The earth/ground points are identified by "GP" and their location is shown in a vehicle diagram.

The connectors are identified by an X and a number.

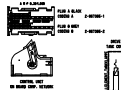

Wherever wires branch to another page, the coordinates and, in certain cases, the terminal markings are indicated.

The feed wire of wire joints and bridge connectors is indicated by an arrow.

PREINSTALLATION MODULE

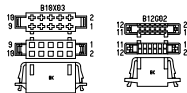

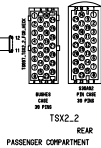

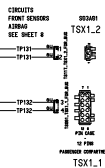

Figure 1 is a schematic diagram of the 140-GeV electron beamline. The beam starts at the top left, passes through a series of magnets and bending magnets, and is directed towards the target area at the bottom right. The diagram shows the beam's path through various components, including bending magnets and a target area labeled "140-GeV ELECTRON BEAM".
